

## **ENVIRONMENTAL & SUSTAINABILITY POLICY**

Next Control Systems market and install a range of building environmental control products that have a direct impact on our customers building energy consumption and carbon footprint.

As a result, not only do we strive to minimize the impact of our own operations on the environment. We also directly assist our customers in achieving their goals of improving environmental performance through conserving energy consumption.

We continue to seek improvement of our own and our customer's environmental performance through regularly reviewing our processes of management and control to:

1. Comply with the requirements of environmental legislation and approved codes of practice.
2. Consider assess and take action where necessary to continuously improve our environmental practice.
3. Ensure that our employees at all levels understand both the companies and their personal responsibility towards the environment through training and appropriate documentation.
4. Publish this policy to our customers, suppliers and contractors.
5. Purchase our materials efficiently to reduce waste and the use of non sustainable materials.
6. Adopt a philosophy of minimizing pollution and vehicle emissions in every aspect of our business.
7. Encourage our suppliers and contractors to adopt similar environmental standards.
8. Adopt an 'energy efficiency' conscious approach to the design and implementation of all our control systems and services.
